

## BOP AND RISER CLEANING

# TRAP TOOL

TECSEP's Trap Tool is a riser junk basket for use in marine-riser and BOP clean-up operations. Generally positioned above the Riser Brush Tool, the Trap junk basket collects any debris falling out of circulation as a result of reduced annular velocities in large ID marine risers.

COLLECTS ANY DEBRIS FALLING OUT OF CIRCULATION

## APPLICATIONS

- Marine riser cleaning operations.

RELIABLE TOOL FOR MARINE RISING CLEANING

## FEATURES AND BENEFITS

- The large capacity basket features a retaining screen in the base for enhanced debris collection.
- The trap junk basket works in conjunction with the line of blowout preventers (BOPs) and marine riser clean up tools.
- Large volumes of debris can be collected in the catchment chamber, which helps to prevent miss runs during completion operations.

TRAP TOOL

## TOOL SPECIFICATION

Connetion	Determinated by location
Maximum RPM	120
Maximum makeup torque (ft/lb)	Dependent on connection
Maximum flow rate (BPM)	42
Tool length	6 ft
Maximum OD	17 in.
Drift ID	2-7/8 in.
Tensile yield	1,925,500 lb
Torsional yield	Dependent on connection
Bucket OD	17 in.
Materials	Alloy steel 120 KSI minimum yield strenght
