

CHEMICAL CLEANING

TEC-VIS

TECSEP's Viscosifier (TEC-Vis) is a suspension of xanthan gum in an organic solvent gel, it assists in the displacement of fluids, mud, and debris from wellbores.

TECSEP CLEANING SOLUTIONS APPLICATIONS

- Chemical that assists in cleaning wellbores.
- Creation of a spacer pill for completion fluid systems.

FEATURES AND BENEFITS

- TEC-Vis enables users to easily create solids-free spacers that improve displacement efficiency and wellbore cleanout.
- TEC-Vis can be used in fresh water and a wide range of brines.
- TEC-Vis is a liquid-based polymer additive rather than a powder-based additive; therefore, it disperses rapidly without leaving behind clumps of the condensed viscosifying agent in the wellbore.

TEC WASH

TECHNICAL SPECIFICATIONS

Specific gravity	0.97
Flash point	> 158° F (>70° C)
Appearance	Liquid
Color	Cream
pH	5.5 to 8.5
Viscosity	50 cP
